DXpedition News

Heard Island - VKØ The 1995 Heard Island DXpedition remains on schedule. 3YØPI team members ON6TT, KK6EK, HB9AHL, and KØIR will be joined by JH4RHF, N6EK, PA3DUU, and RA3AUU. The advance team of PA3DUU and ON6TT will arrive in Perth, Western Australia on Oct. 22. The rest of the team will arrive one week later. The innovations tested on Easter Island (XRØY) will be used by the Heard Island expedition team. A beacon (VK6DIR/MM) will be activated as the ship weighs anchor and will remain on the air until we are active from Heard Island. We will maintain a home page on the World Wide Web, operate a callsign look-up service to allow you to see "if you are in the log," and distribute e-QSLs. Details on accessing and using these services will follow.

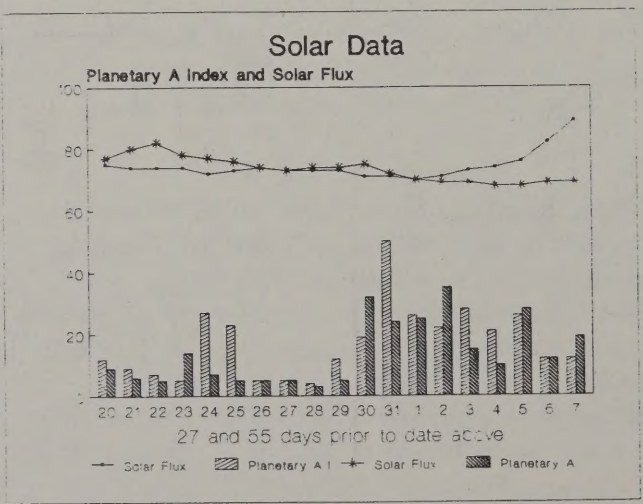
Propagation Watch

There's life in Sunspot Cycle 22! Following a period of few, if any, sunspots, the Sun boasted two significant sunspots last week. Region 7912 is the largest spot in months, and, combined with smaller Region 7910, pushed the solar flux above 90, its highest level since May.

This brief burst of solar activity was not enough to provide a stable ionosphere, but was enough to open most DX paths on 15 meters, and improved the regular north-south openings on 10 meters. 17 meters was particularly productive.

Regular readers of the this column know that it takes but a single sunspot of reasonable size to push the maximum useable frequency up a band or two. DXers who paid attention to the WWV/WWVH reports were rewarded with some of the best 15-meter propagation we have had for six months.

While we don't expect these sunspot regions to last the 28 days it takes for the sun to complete a revolution, this burst of solar activity serves to remind DXers to keep an ear out for such an event. Good hunting!



1995 Japan International DX SSB Contest

The 1995 JA DX SSB contest, sponsored by Japan's *Five-Nine* magazine, runs from 2300Z Friday, Nov. 10 to 2300Z Sunday, Nov. 12. Maximum of 30 hours, with off times a minimum of one hour. 80, 40, 20, 15, and 10 meters. Japanese stations will return prefecture number (1-50). Two points for contacts on 75 and 10 meters; one point for QSOs on other bands. Multipliers for non-JA stations are Japanese prefectures per band. Logs by band to JIDX contest, c/o Five-Nine Magazine, P. O. Box 59, Kamata, Tokyo 144, Japan, by the end of December. Plaques to top continent and Zones 4, 5, and 14 scorers. The top USA single operator earns a free round-trip ticket to Japan to pick up the prize! (A complete set of rules is available from The DX Bulletin for an SASE.)
